

## SECTION 6: METHODS AND FUNCTIONS, 2 hours 54 mins, 30 parts

### • 16/29 Coding Exercise 16: Functions #7: is greater

Instructi > <

to enter!

To give an idea what the above function would look like when tested:

```
1 | is_less(5,9)
2 | # Output:
   | True
```

Added note: this

exe

tha

fun

or

Pri

wil

exercise.py

```
1 def is_greater(a, b):
2     if a > b:
3         return True
4     else:
5         return False
6
```

code

Dismiss

- -> we've defined a function with two conditions -> if one of the arguments is greater than the other then we return True
- -> we don't use elif as there is only one condition
- -> the function returns a boolean value
